

AMIFOSTINE

This leaflet should be used in conjunction with the complete consumer medicine information (CMI) which is available from any pharmacy.

This leaflet contains information about Amifostine including details of known side effects. It does not include every possible side effect.

The type and severity of side effects experienced differs for each child. Some side effects are minor and easily treated at home. However, others may be more serious and require prompt medical assessment. Side effects from treatment are routinely monitored with blood tests and clinical examination. If you have any questions about side effects during treatment, please speak to your doctor. Also, if your child experiences any problems or side effects during treatment, please contact your doctor, clinical nurse consultant/coordinator or pharmacy staff for advice.

USE

- To decrease cisplatin toxicity

OTHER NAMES

- Ethyol®

PRESENTATION

- A clear, colourless liquid
- Drawn up in a syringe

ADMINISTRATION

- Intravenous infusion
- Intravenous injection

SIDE EFFECTS

Common

IMMEDIATE

(within 1-2 days of receiving drug)

- Nausea
- Vomiting
- Low blood pressure
